

**Safety Grooving & Grinding**  
**Southeast Division**

**Beach Boulevard Intracoastal Waterway Bridge**

Safety Grooving & Grinding, Southeast Division is performing the profilograph testing, grinding & grooving on this \$40 million dollar bridge. This will add the finishing touch for the bridge to have a smooth ride, excellent drainage, and great friction values for the safety of the traveling public.

**Owner:**

**Jacksonville Transportation Authority**

**General Contractor:**  
**Superior Construction**

This is a main route from Jacksonville to the many beaches along the Atlantic Coast. With the old lift bridges traffic would back up for a mile or more whenever they would open for boaters. This will not be the case with the two new fixed high level bridges.

The North bridge will be complete in Spring of 2008, and the South bridge will be complete in Summer of 2009.
