

# Grooving, Slurry Recycling

**Job Description:** Allegheny County Airport Runway Grooving  
**Prime Contractor:** Swank Associated Companies, Inc.  
**Quantities:** 73,620 sy Asphalt, 14,000 sy Concrete  
**Began:** May 3, '02,  
**Completed:** May 21, '02

The challenge was to recycle all waste water (slurry) from the grooving operation. We did this in conjunction with a Pittsburgh based company called Roediger. They lease out equipment nationwide for a variety of applications. It was not inexpensive but a very effective way to recycle the water we used. We now had a good analysis of what this would cost to offer it to owners of any future projects.
